

**1. Following the observations submitted to the Jury regarding aspects of the originality of concepts in the nominated projects, we make the following clarifications:**

- **Laser Valley - Land of Lights is a competition of ideas on urban organization of a territory, not a design competition for architectural objects or programs.**
- **The design brief allowed multiple presentation techniques including collage (see page 15, Chapter 8 - Submission Requirements).**

**2. In connection with the observations received, the Jury identified two categories of projects:**

- **Projects that meet the competition theme and where the collages used to illustrate a certain atmosphere did not affect the originality and the value of the underlying urbanistic idea. These were accepted.**
- **Projects that meet competition theme, but used collages of existing architectural and urbanistic works in a way that puts into question the originality of the concept presented. These were rejected.**

**3. As a result, the Jury decided to withdraw the mention granted to the project *PULSE RING*.**
